Dear Patients,

We at OAM are proud to introduce telemedicine to our practice. For those patients who are uncomfortable with an office setting, a telemedicine appointment can be arranged for you. Simply contact the office by phone, website, or smartphone app to request a telemedicine appointment and the physician will call you at your scheduled time. These appointments can be done via Skype or FaceTime based on patient preference. In addition, if you have an Android device, someone from our office will be available to assist you in setting up a Skype account if necessary.

At OAM, we have always taken great pride in the high level of Orthopaedic care we have provided. In addition to telemedicine, we will continue to see patients in an office setting as we always have. Please note that in an effort to protect our staff and our patients, we have implemented a COVID-19 protocol, allowing us to continue to treat our patients in a safe environment. We are screening all staff and patients for COVID-19 symptoms at the door including temperature scanning. Patients with a fever or upper respiratory symptoms will be rescheduled, and any staff with symptoms will be sent home.

We look forward to continuing our treatment of you during this difficult time.
